HyperTED: empowering TED Talks CHAPTERS CHAP

Hot Spots: highlighting important fragments

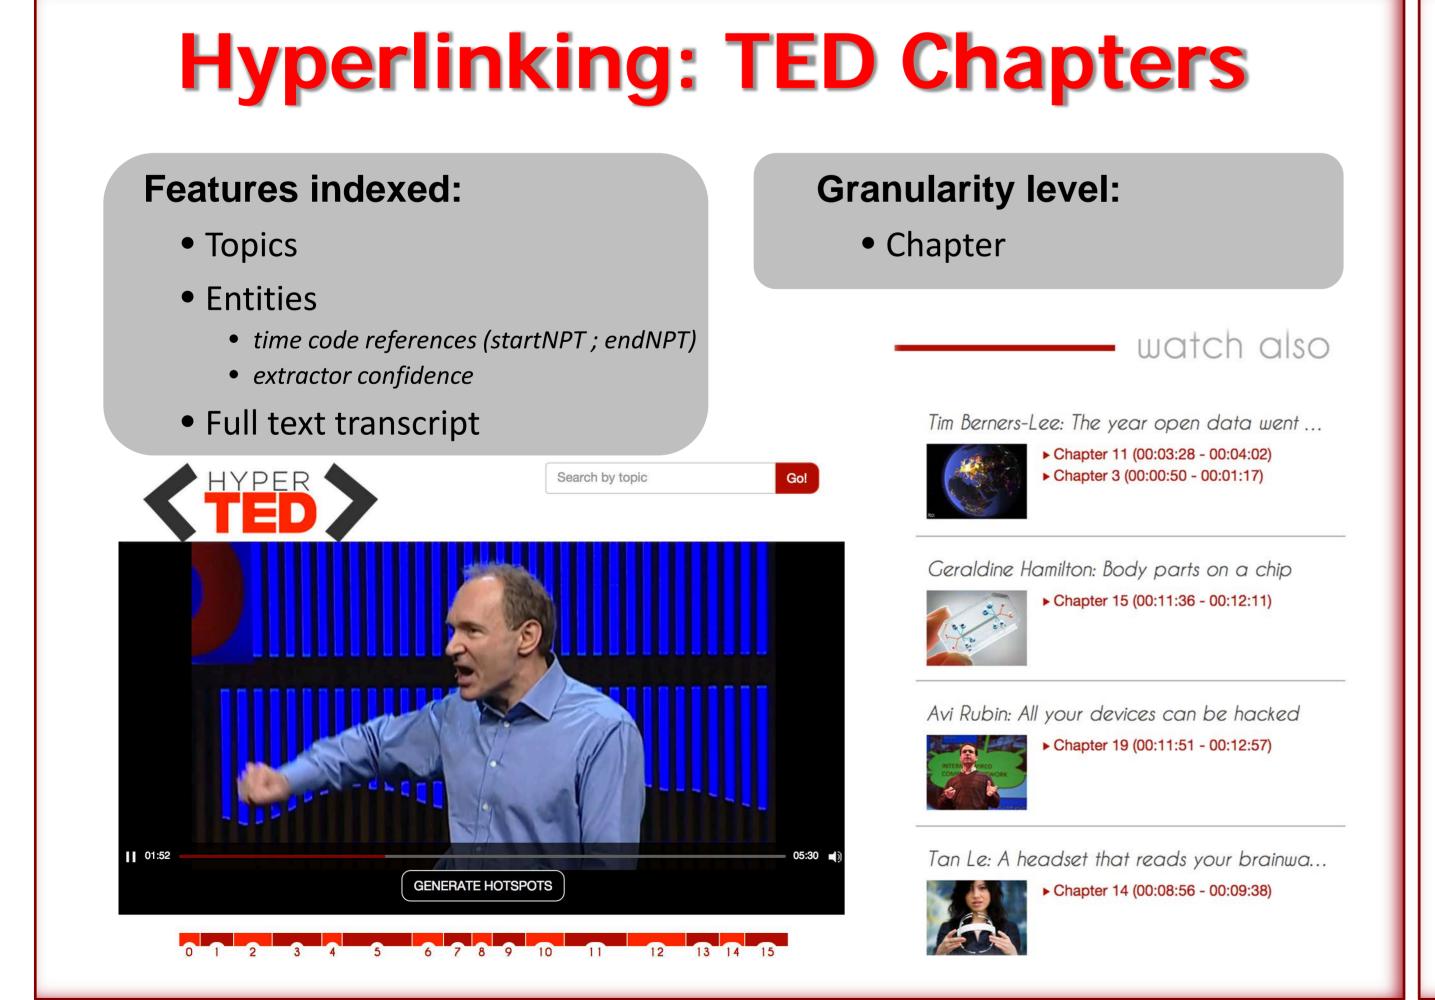

1. Clustering of consecutive chapters which are about similar topics and entities

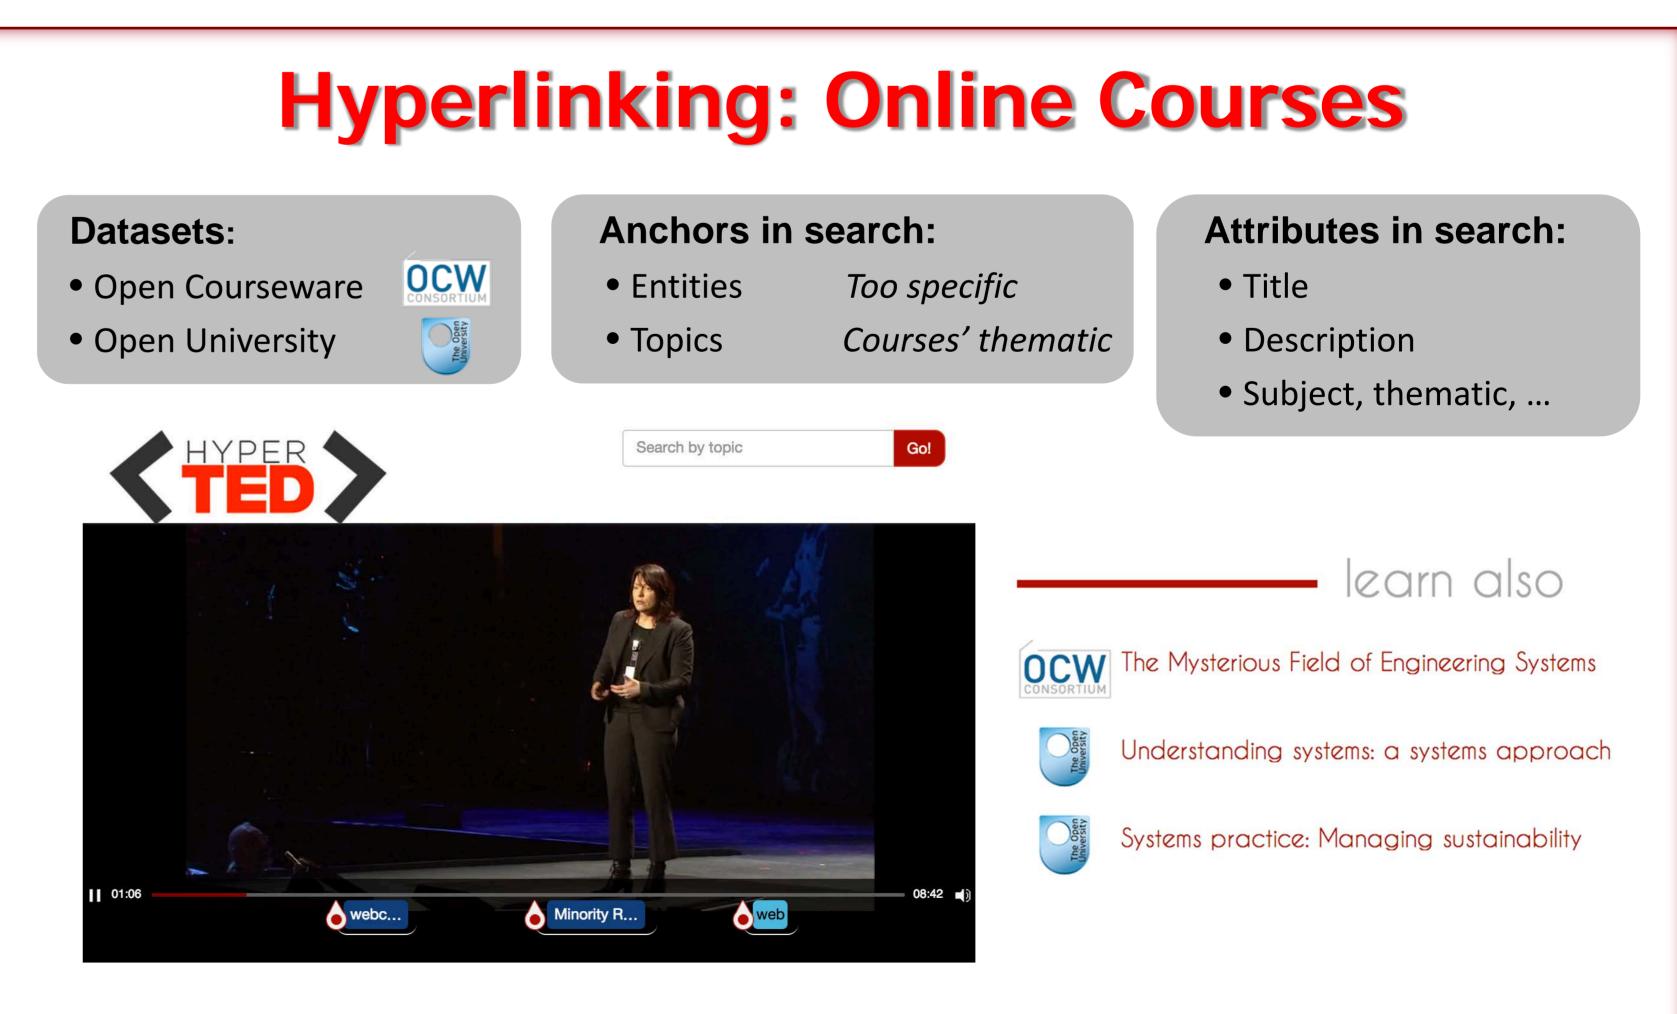

$$d(Ch_{1}, Ch_{2}) = w_{topic} \cdot \left(\frac{|T_{1} \cap T_{2}|}{max\{|T_{1}|, |T_{2}|\}}\right) + w_{entity} \cdot \left(\frac{|E_{1} \cap E_{2}|}{max\{|E_{1}|, |E_{2}|\}}\right)$$
(1)

2. Ordering of those fragments based on annotation relevance (TF-IDF)

$$Relevance\left(Fragment\right) = \frac{w_{topic} \cdot \sum_{t \in T} Rel_t + w_{entity} \cdot \sum_{e \in E} Rel_e}{Duration(Ch)} \tag{2}$$

3. Filtering the fragments whose relative relevance falls under the **first quarter**
